

# Hubbard Glacier

The longest river of ice in North America, the Hubbard Glacier is also one of the most active glaciers of its kind in Alaska. And since our ships are designed to provide our guests with the best viewing possible, you'll be able to see this massive natural wonder, with its 1,350 square miles of blue ice, from just about anywhere on the ship.

## The One Thing You Don't Want to Miss

Wonder at 1,350 square miles of translucent blue ice as you experience the excitement of seeing an active glacier up close. Even the ship will feel small.
